
CYBER POLYGON

CLUES TO THE ELITE'S NEXT PANDEMIC

Presenter – Cathleen McGuire
Co-Author – Colleen McGuire

June 10, 2021

tinyurl.com/cyber-polygon-2021

INTRODUCTION

- The Great Reset is a plan of action by Davos billionaires to collapse our entire economic, political, and social order.
 - The Great Reset is an outgrowth of Agenda 21, a United Nations comprehensive program ostensibly to achieve social, economic, and environmental sustainability.
- The Great Reset is NOT set in stone. We the People have the power to stop it.
- On July 9, 2021, the World Economic Forum (WEF), will co-host Cyber Polygon.
- [Cyber Polygon 2021](#) is a live exercise simulation to repel a supply chain attack on a large corporation by some “rogue state.” Among the world’s banking cognoscenti, the believed, if not hoped for, end-result would be to crash the global financial system.
- Some speculate that such a crash, disguised as a simulation, is an actual elite goal so that if/when the simulation goes live, the crash (false flag or otherwise) would allow the installation of a digital social-credit system, a key foundational component for the elite’s new world order.

WHAT IS A SIMULATION?

- A simulation is the imitation of a real-world process or event.
- They are role-playing exercises such as:
 - War games – military
 - Drills – sports teams
 - Political plotting – 2020 election (Transition Integrity Project)
 - Computer stress tests – tech companies
 - What-if outcomes – think tanks
- Defensive/Predictive – protect against an attack
- Offensive – rehearsal of a plan to attack

WHY STUDY SIMULATIONS

- Simulations contain clues telegraphing the elite's goals and intentions.
- By reading the tea leaves, one can decipher the desired real-world outcomes as expressed in simulations.
- Simulations inform us who the organizers and participants are, as well as enable the authorities to reify the simulation for the participants.
- Past simulations speak to the reliability of subsequent simulations.

NOTABLE VIRAL PANDEMIC SIMULATIONS

NAME	DATE	PRIMARY SPONSORS	AGENDA
Dark Winter	2001, June	Johns Hopkins	War gaming a bioterror attack. Presaged the 9/11 anthrax attack.
Lockstep	2010, July	Rockefeller Foundation	Analytical report. Presaged Covid pandemic.
SPARS 2025-2028	2017, October	Johns Hopkins	Futuristic scenario. Presaged Covid pandemic.
Clade X	2018, May	Johns Hopkins	Prevent or diminish a bioterror attack. Presaged the Wuhan bioweapon theory.
Crimson Contagion	2019, August	US Govt, Dept of Health, Homeland Security, and FEMA	Respond to a Chinese viral outbreak. Presaged Covid pandemic.
Event 201	2019, October	Johns Hopkins, WEF, Gates Foundation	Respond to a severe viral pandemic. Presaged Covid pandemic.
Cyber Polygon	2019, July	Russia's Sberbank, WEF, IBM	First live, international cybersecurity training. Corporate teams defended against cyberattacks.
Cyber Polygon	2020, July	Russia's Sberbank, WEF, IBM, ICANN	Live exercise to prevent a cyberattack targeting a large corporation.
Cyber Polygon	2021, July	Russia's Sberbank, WEF, IBM, ICANN	Live exercise to prevent a cyberattack aimed at disrupting supply chains.

HISTORY OF SIMULATIONS – REAL TIME

9/11, 7/7, BOSTON MARATHON

- Real Time means the actual event is happening live at exactly the same time as the simulated version is taking place.
- NORAD war games playing out while the 9/11 “terrorist” attack was simultaneously happening.
 - Air traffic controller phone call: "Is this real-world or exercise?"
- London 7/7 “terrorist” bombing in the Metro was simultaneous with a real-world drill, July 7, 2005
- April 2013, the Boston Marathon bombing was widely reported to be a live drill.

HISTORY OF SIMULATIONS – PREDICTIVE

DARK WINTER – JUNE 2001

- Bioterror smallpox simulation at Andrews Air Force Base presaged the 9/11 anthrax attacks.
- Participants included CIA, FBI, politicians, media, and government agencies.
- Many Dark Winter participants also involved in Covid simulations, and had foreknowledge of both events.
 - Cipro | Hydroxychloroquine
 - Put calls | insider trading
- Real-life 2001 Patriot Act mimicked Dark Winter simulation outcomes such as the Global War on Terror and removal of civil liberties.

HISTORY OF SIMULATIONS – PREDICTIVE

LOCK STEP – JULY 2010

- The Rockefeller Foundation led a year-long project to produce a report which strategized the government's response to a "new influenza strain" and the role of technology.
- The project included four scenarios, one of which — Lock Step — entailed a Covid-like pandemic. There were no “tabletop” exercises for the simulated scenarios, just the report.
- Lock Step called for quarantines, lockdowns, masks, temperature checks, and behavioral detection technology (fMRI). The economy was devastated by long-term shuttering of stores and offices, and tourism, and global supply chains were debilitated.
- Initially, when the scenario began in 2012, citizens welcomed martial law and draconian responses. But by 2025, they were weary and unrest grew in the form of nationalism. The report praised China's authoritarian handling of the pandemic.

HISTORY OF SIMULATIONS – PREDICTIVE

SPARS PANDEMIC – OCTOBER 2017

- SPARS was an 80-page report written in 2017 by a Johns Hopkins team of a fictional Covid-like pandemic scenario taking place in the years 2025-2028.
- The report's purpose was to assess how health officials can optimize communications with the public in the face of a "novel coronavirus" they dubbed "SPARS."
- In other words, the self-guided exercises were not about handling a pandemic, but rather to prepare public health communicators for how to publicly *respond* to a pandemic.
- SPARS merits our attention due to its many uncanny similarities to our Covid pandemic.
- Image on left is from the SPARS report. The fictional St. Paul Chronicle shows how these simulations are practically pitch-perfect replicas of real-life media.

HISTORY OF SIMULATIONS – PREDICTIVE

SPARS AND COVID – UNCANNY SIMILARITIES

NAME	SPARS SIMULATION	COVID
Similar name	SPARS – St. Paul Acute Respiratory Virus	SARS – Severe Acute Respiratory Virus
Similar Asian Origin	Philippines	China
Similar anti-viral treatment and side effects	Kalocevir creates cough, fever nausea, malaise	Remdesivir creates cough, fever nausea, malaise
Massive propaganda campaign to counter public fear of unknown effects due to absence of long-term clinical trials	Government messaging at all stages, tapping Big Tech, former US presidents, media, celebrities, hip hop stars, experts, and global health executives.	Similar government messaging at all stages: ex-presidents shown getting the shot, celebrity PSAs, popular culture targeted (Brad Pitt on SNL as Fauci, Lady Gaga hosting WHO's One World: Together at Home concert), medical experts, etc.
Focus on winning over “vaccine hesitancy” in minority communities	Campaign focus on Muslims (believe vaccine contains pork), African Americans (Tuskegee memories), and alternative health advocates.	Campaign focus on African Americans (Tuskegee memories) in specific and ethnic minorities in general.
Blame diverted away from Big Pharma	Politicians and agency reps under fire for “sensationalizing the severity of the event for perceived political gain.”	Politicians and health officials targeted for covering up origin of virus (Fauci) and implementing lethal and destructive policies (Cuomo, Newsome, Whitmer).
Lawsuits	Compensation claims on indefinite hold because causation or consequences are not known.	Compensation claims disallowed by 1986 Congressional act granting vaccine manufacturers legal immunity; updated in 2020 by PREPA

HISTORY OF SIMULATIONS – PREDICTIVE

CLADE X – MAY 2018

- A Johns Hopkins “tabletop” exercise to prevent a bioterror attack in which a virus is unleashed by a “terrorist” group called A New Dawn,
- Participants have Dark Winter and Event 201 ties and longstanding alliances with intel agencies.
- Simulation outcomes:
 - President issues a quarantine. An assessment is needed of the level of enforcement against civil liberties.
 - Healthcare system nationalized.
 - Biometric digital identity is instituted.

HISTORY OF SIMULATIONS – PREDICTIVE

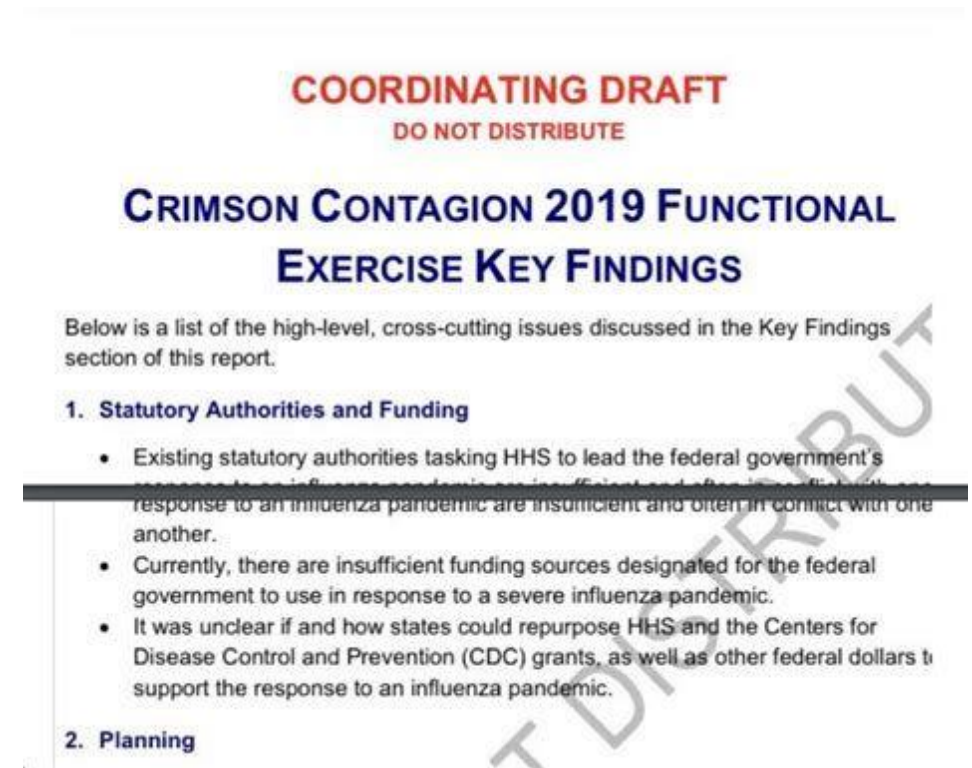

CRIMSON CONTAGION – JANUARY TO AUGUST 2019

- Conducted by Health and Human Services (HSS) in close collaboration with Homeland Security (DHS) and FEMA.
- Simulation participants responded to a dangerous respiratory outbreak of a virus originating in China and spread by returning Americans. Within two months 500,000 died.
- Participants throughout the 8-month period included 12 states, 15 tribal nations, 74 local health departments, 87 hospitals, and over 100 public and private healthcare partners. Also included were 19 federal departments such as:
 - Departments of Defense, Energy, Homeland Security, HUD, Interior, Justice, Labor, State, Transportation, Treasury, and Interior.
- Key findings included US not prepared for a major pandemic, and an over-reliance on Chinese supply chains for 90% of US medical products.

HISTORY OF SIMULATIONS – PREDICTIVE CRIMSON CONTAGION . . . AND NOBODY TALKED

- The year before Covid, hundreds of mostly government employees participated in Covid-like pandemic exercises.
- The 2019 simulation's dire scenario had half a million dying in two months. So in March 2020, when authorities rashly predicted 2.2 million Americans would die, no wonder Crimson participants were so ready to believe the Covid pandemic was real. They had just “lived” through it.
- Why weren't the participants talking about Crimson when the real Covid hit? Did they have a case of amnesia? Had they signed NDAs? Why didn't the media interview them?
- The Crimson exercises were supposedly meant to prepare a vast swath of the governance class for a pandemic. But might its ulterior purpose have been to gaslight the participants to regard the Covid “pandemic” (as many skeptics call it) as an *actual* pandemic, thereby cueing them up to be 100% on board with Fauci's fiats.

HISTORY OF SIMULATIONS – PREDICTIVE

EVENT 201 – OCTOBER 2019

- Participants at a New York City luxury hotel included WEF, Gates Foundation, Johns Hopkins, World Bank, Bloomberg, Big Pharma, and head of China's version of CDC.
- The goal was to determine the world's response to a global coronavirus outbreak, which happened two months later to a T. The 3-hour tabletop exercises entailed:
 - 60 million people predicted to die
 - Quarantines – mass lockdowns [destroying small businesses]
 - Civil unrest – rioting in the streets
 - Censorship – obsession with “disinformation”
 - Removal of civil liberties – mistrust of government

“OPERATION CORONAVIRUS” IN THE MAKING FOR TWO DECADES

NAME	DATE	GOVERNMENT SOURCE	AGENDA
Model State Emergency Health Powers Act	1999	CDC – draft to rally 50 US states to enact proposed legislation	Draconian legislation — including forced vaccinations — as a response to epidemics, pandemics, and bioterrorism.
Patriot Act	2001	US Congress, Section 817	Expansion of the Biological Weapons Statute which gave the USG immunity from violating its own biological weapons laws.
Project BioShield Act	2004	US Congress passed shortly after 9/11	10-year, almost \$6 billion plan for USG to create and produce vaccines and treatments for anthrax, Ebola, the plague and other potential bioterrorism agents
Public Readiness and Emergency Preparedness Act	2005	US. Congress passed PREPA	Enables HHS the power to waive legal liability for corporations producing vaccines (“covered countermeasures”) in a public health emergency.
USNORTHCOM Branch Plan 3560	2017	US Military	Warned of a possible "novel influenza disease" that could strike the US and leave it unprepared. Outlined coordinated response with DHS, FEMA, USDA, HHS and NGOs like USAID.
Cybersecurity and Infrastructure Security Agency Act	2017	US Congress, similar to Section 817 of Patriot Act	Respond to a severe viral pandemic. Presaged Covid pandemic.
PREPA	2020	US Congress updated 2005 Act	Provide liability immunity for activities related to medical countermeasures against COVID-19.
National Covid Commission (proposed)	2021	Based at University of Virginia, involving public and private experts and charitable foundations	Proposal to model a Covid investigation akin to a 9/11-style commission, headed by UV professor Philip Zelikow who chaired the 9/11 Commission.

CYBER ATTACKS

THE PURPOSE OF CYBER ATTACKS

- Purposes include economic or political warfare, intelligence, technology secrets, ransomware, theft, and hacker bravado.
- Attacks are carried out by criminals, “terrorists,” rogue states, and state-sponsored actors.
- Online, computer attacks create chaos and civil unrest by sabotaging our highly digitalized, interconnected “SMART” world.
- Klaus Schwab: “The Covid crisis would be a small disturbance compared to a major cyber attack.”

TARGETS OF CYBER ATTACKS

Attacks can be a Trojan horse for other purposes, such as to enter a system, create a distraction, and linger for weeks, if not months, prowling around to do future damage.

- Power supply, transportation
- Hospital services
- Medical devices that keep people alive
- Financial systems
- Energy grids
- Water treatment
- Government and corporate IT systems
- Military and defense infrastructure

NOTABLE CYBER ATTACKS

NAME	DATE	FOCUS
<u>Stuxnet</u>	2010, June	US/Israel warfare attack on Iran's nuclear facilities
<u>SWIFT</u>	2016, February	Hackers tried to steal \$1 billion from Bangladesh central bank
<u>SolarWinds</u>	2021, Feb-June	Spy attack on corporate/government systems
<u>Colonial Pipeline</u>	2021, May	Criminal "ransomware" attack on gas supply chain
<u>JBS Foods</u>	2021, May	World's food supply at great risk cyber attacks and more
Infrastructure	Ongoing	Ramping up and branching out of attacks in a wider circle of industries with Russian and Chinese criminals blamed

CYBER ATTACK: GEOPOLITICAL SABOTAGE

STUXNET – JUNE 2010

- Stuxnet was one of the first sophisticated, large-scale, brazen cyber attacks waged against a sovereign state.
- It is widely believed Israel and the US launched the warfare attack on Iran that sabotaged Iran's nuclear facilities.
- A worldwide release of the viral Stuxnet “worm” ensued.

CYBER ATTACK: FINANCIAL THEFT

SWIFT – FEBRUARY 2016

- Hackers tried to steal \$1 billion from SWIFT, the global financial system's main information network.
- The target was Bangladesh's central bank.
- A cyber attack shook the financial world, and was a wake-up call that digital bank thefts were no longer petty crimes. Rather, cyber attacks now posed systemic threats to the entire financial system.

CYBER ATTACK: SENSITIVE DATA THEFT

SOLARWINDS – FEBRUARY TO JUNE 2021

- A hacker spy attack was carried out on SolarWinds, a Texas company that sells routine software updates to 18,000 customers.
- Hackers slipped malware into SolarWinds' update code which then infected customer systems.
- Had the attack not been discovered, hackers could have accessed very sensitive information from SolarWinds' powerful clients, including:
 - Microsoft, Cisco, Intel, Pentagon, Departments of Treasury, Agriculture, State, Justice, Commerce, Energy, and Homeland Security.
- Russian intelligence blamed and Biden threatens Russia with sanctions.

CYBER ATTACK: GAS SUPPLY CHAIN

COLONIAL PIPELINE – MAY 2021

- Ransomware attack carried out on the largest pipeline operator in the US.
- Colonial's entire network was shut down from Houston to New York City.
- 45% of the East Coast gas supply chain was affected, causing gas shortages, price increases, and long lines at gas stations.
- Colonial reportedly paid \$5 million to DarkSide, a Russian "criminal" group.

CYBER ATTACK: FOOD SUPPLY CHAIN

FROM SIMULATIONS TO LIVE EVENTS

- In November 2015, a [Food Chain Reaction](#) simulation with Big Ag players convened to “game out” how the world would respond to future food shortages.
- Mysterious feedlot and granary fires such as Beirut in August 2020, the largest non-nuclear explosion in history. (Might this have been a cyber drone attack?)
- March 2021, Evergreen Suez Canal “accident,” which grounded global container ships, most carrying food. (Did cyber “pirates” digitally commandeer the ship?)
- JBS Foods, world’s largest meat supplier, suffers cyber attack, May 2021.

CYBER ATTACK: INFRASTRUCTURE

MEDICAL, LAW ENFORCEMENT, TRANSPORTATION

- In 2020, 59 [healthcare providers/systems](#) were threatened by ransomware, affecting 510 facilities. In September, 250 hospitals were actually attacked. When computer systems went down, chaos ensued: health workers were reduced to paper and pen, emergency rooms were disrupted and wireless vital-signs monitoring equipment broke down..
- May, 2021, Washington, DC, thousands of [police files](#) were stolen and released on the dark web for ransomware, including disciplinary files, sensitive and embarrassing information, and intelligence reports with links to FBI and Secret Service.
- In June 2021, hackers struck the payment system of Massachusetts [ferries](#). Credit card capabilities were inoperable, forcing the ferries to unexpectedly deal exclusively with cash payments. New York City admitted its [subway system](#) was breached in April, with hackers rumored to have ties to the Chinese government

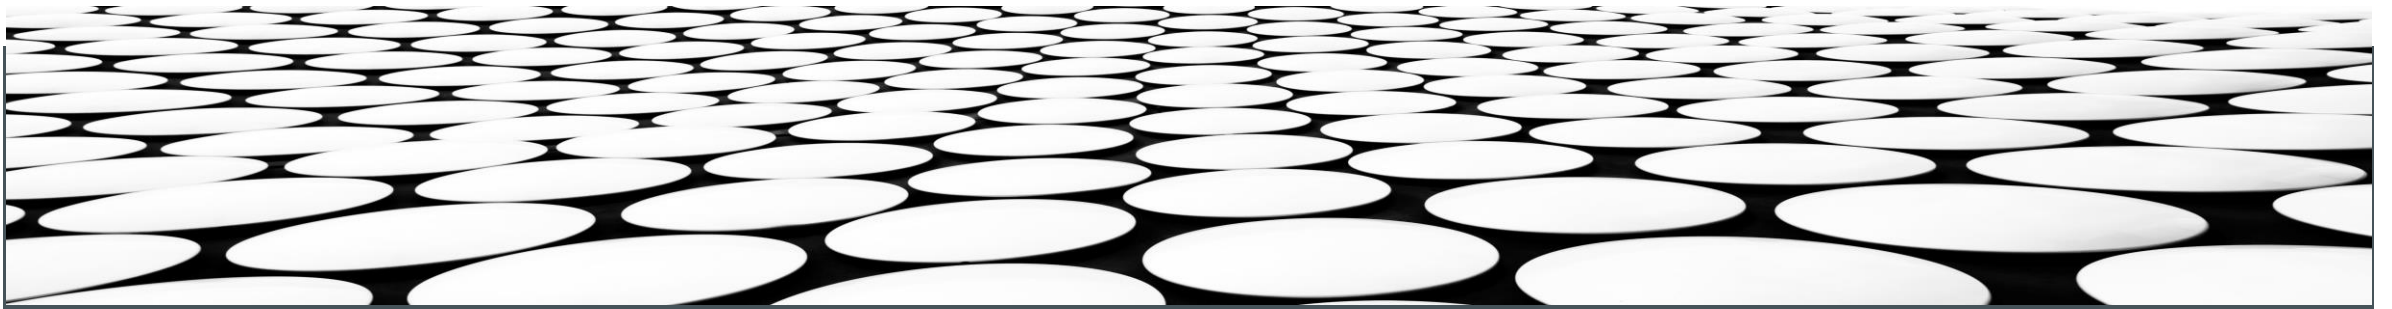

CYBER ATTACKS

GLADIO 3.0?

- After WWII, [Operation Gladio](#) was a covert NATO black op whose forces deliberately terrorized Europe with bombing attacks and kidnappings to create a “strategy of tension,” Local communists were blamed to blunt their rising power.
- In the last decade a rash of alleged false flag events to destabilize society occurred in Paris, Orlando, San Bernardino, Nice, Brussels, Munich, Norway, and elsewhere by assets with suspicious Deep State connections. Some dubbed this almost-yearly flurry of attacks “Gladio 2.0.”
- Might the cascade of cyber attacks likewise be a contemporary version of Operation Gladio blamed on “rogue actors” — a Gladio 3.0?
- There is a fine line between criminals versus covert use of criminal elements by state actors. For example, the CIA as project manager of the Kennedy assassination tapped Cuban, Italian, Jewish, and Corsican mafias to execute the operation.

CYBER POLYGON

CYBER POLYGON

SIMULATIONS OVERVIEW – 2019, 2020, 2021

- The Cyber Polygon simulations get more robust each year, while still maintaining many similarities across the three events.
- The Existential Problem: As digitalization accelerates exponentially, cybercrimes will inevitably increase as well.
- The Uber Mission: To withstand large-scale cyber threats, each link in the chain must repel every attack. A single vulnerable link, like dominos, can bring down the entire global system.
- Main sponsors throughout: WEF, Sberbank, IBM, ICANN
- Participating industries: banks, technology companies, telecom companies, energy suppliers, healthcare institutions, universities, NGOs, law enforcement agencies, and more
- All three Polygon events operate on two parallel tracks: a speakers conference and technical training exercises.

CYBER POLYGON

TECHNICAL TRAINING – 2020

- **FORMAT:** Technical training exercises, primarily for corporate IT cybersecurity teams.
- **GOAL:** Increase cybersecurity technical competency and systems resilience.
- **EXERCISES:** 1) Defend in real time against a live cyber attack, and 2) Determine pre-crime attacks through cyber sleuthing and intelligence.
- **PARTICIPANTS:** 120 organizations, 29 countries
 - An inordinate number of tech team participants were from Russia, Kazakhstan, and Azerbaijan.

CYBER POLYGON

SPEAKERS CONFERENCE – 2020

- **FORMAT:** Live streaming presentations with 16 experts and 5 million viewers in 57 countries.
- **GOAL:** Increase collaboration among participants to achieve global cybersecurity alignment.
- **TOPICS:** Cyber sleuthing, digital trends, fake news, trust, cyber criminals, 5G and AI networks
- **KEY SPEAKERS:** Russian Prime Minister Mikhail Mishustin, Klaus Schwab, Tony Blair, Herman Gref (CEO, Sberbank)

CYBER POLYGON

RUSSIA'S CURIOUS LEADING ROLE

- Russia's Sberbank is the main organizer of Cyber Polygon. The bank's cybersecurity subsidiary, BI.ZONE, directs all simulation exercises.
 - The official Cyber Polygon website is in Russian and English.
 - The Prime Minister of Russia gave the opening address in 2019 and 2020, and probably will do so in 2021 as well since Russia is once again the event organizer.
- Is it a façade that Russia is the West's mortal enemy?
 - Why would the West participate in an event in which Russians acquire significant intel as to the cyber-defense capabilities of global banks, corporations, and governments?
- Why is China not a participant given it is the model of digital social control?
- Why is Israel not a participant given their worldwide industry dominance of the development, maintenance, and sales of cybersecurity and surveillance software?

Established in 1841

SBERBANK

CYBER POLYGON

COMPARISON OF 2019, 2020, 2021

	<u>POLYGON 2019</u>	<u>POLYGON 2020</u>	<u>POLYGON 2021</u>
Overview	Modest, limited debut	More masterfully planned and more widely attended	Greatly expand on the prior Polygons to game out a calamitous global digital pandemic scenario.
Selected Themes	Companies can better repel a cyberattack through collaboration with other companies versus by themselves.	A data breach can jeopardize reputations and public trust. Raise public and private awareness of cybersecurity dangers and best practices.	A weak link can adversely impact global supply chains causing widespread chaos and damage.
Scenario	Prevent an attack to a single company by targeting one of their web apps.	Prevent a sensitive data breach of a single large company threatened by ransomware attackers aiming to compromise confidential client information.	Prevent an attack on a company's ecosystem from hackers inserting backdoor code into the production processes in order to steal downstream client data.

WHAT IF JULY 9, 2021 POLYGON GOES LIVE?

WEF's POLYGON FORECASTS

COVID PANDEMIC – MODEL FOR FUTURE CRISES

- Klaus Schwab: Covid a “small disturbance” by comparison
- According to WEF, our "new normal" isn't COVID-19 itself, but rather *COVID-like* crises with tipping point capacities.
- Covid is the new model for restricting our freedoms over and over with an ever-new threat of the month (conceivably false flag in origin) such as:
 - food shortages or even famines
 - weather modification like fires, tsunamis, droughts, or floods
 - UFO attack
 - a super virulent viral pandemic of Spanish Flu proportions
 - power grid blackouts

WEF's POLYGON FORECAST

CYBER PANDEMIC – SPREADS FASTER AND FURTHER

A cyber attack would spread faster and further than a bio virus, impacting society in mere weeks if not days.

- Don't expect to ease your way into a response and solutions.
- Unlike Covid that took several months for the public to adjust, a cyber pandemic could require much more immediate personal reaction.

WEF's POLYGON FORECAST

CYBER PANDEMIC – MORE DEVASTATING IMPACT

A cyber attack would have a more devastating impact on society than the Covid pandemic.

- Millions of devices could be taken offline in a matter of days blocking all communication and online operations.
- Like Covid lockdowns, a cyber lockdown would be instituted until a digital vaccine is developed for the digital virus.

WEF's POLYGON FORECAST

CYBER PANDEMIC – MORE CHALLENGING RECOVERY

A cyber attack would entail a more extremely challenging recovery because major supply chains would be disrupted.

- As we saw with the Covid lockdowns, remaining small businesses would be devastated if not shuttered since only big corporate entities could weather such a widespread debacle.
- It could take months to get new devices or parts.
 - As we discovered during Covid, China manufactures virtually all of US PPE, antibiotics, and medicines. Similarly, a breakdown could likely occur again in the medical supply chain.
- Many devices will end up wiped of data if not rendered inoperable with limited resupply options.
 - [In 2018, China](#) produced 90% of mobile phones, 90% of computers, and 70% of televisions.

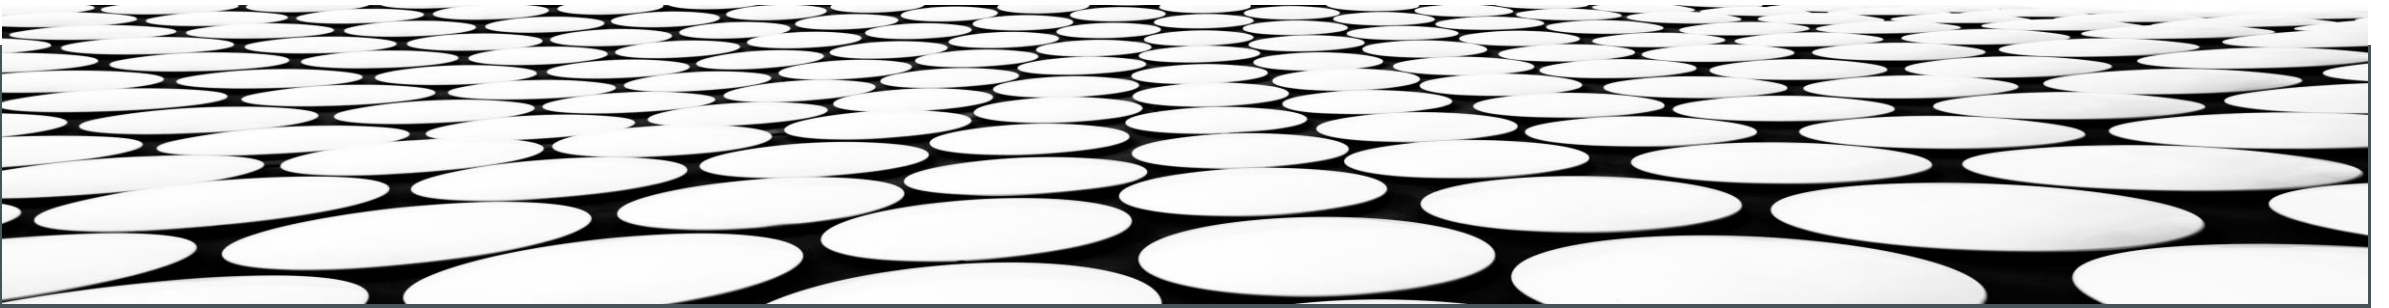

WEF's POLYGON FORECASTS

JUST IN CASE . . .

- It's unclear whether 2021 Polygon will go live on July 9, or whether like Event 2 would happen months later as Covid did. Or whether their fantasy goal will even happen at all!
- Either way, it is prudent to prepare for a short-term power blackout, such as:
 - Back up all your data on hard drives.
 - Keep devices and external batteries fully charged.
 - Acquire a ham radio or acquaint yourself with ham radio operators.
 - Get your bicycle in top shape, and buy spare bike parts
 - Invest in a dehydrator for fresh food options.
 - Stock up on candles, matches, batteries, and all manner of spare parts..
- If you operate a generator, avoid calling attention to this luxury necessity by not turning on your lights at night for all to see.

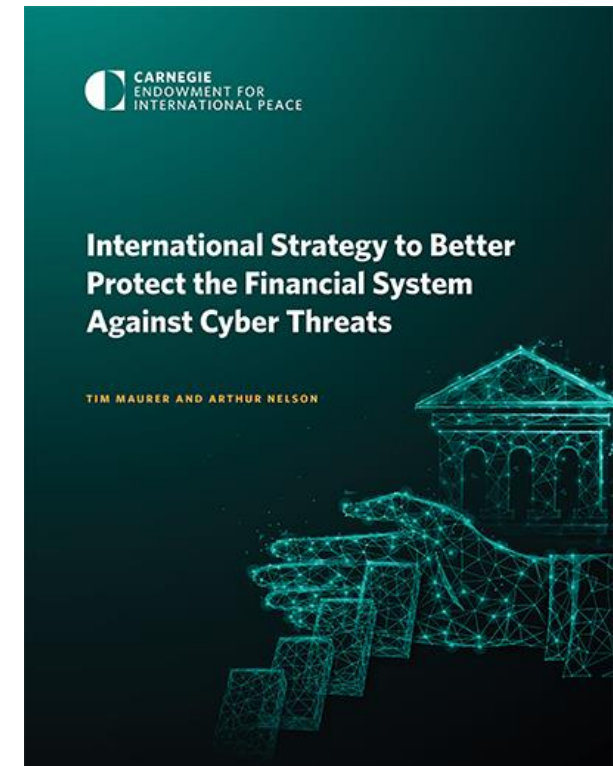

POST-POLYGON, WHAT FRESH HELL IS PLANNED?

ELITE'S NEAR-FUTURE GAME PLAN

DISMANTLE THE GLOBAL FINANCIAL SYSTEM

- The end goal is total control achieved by fusing central banks, financial regulatory agencies, tech giants, and the national security state by first reconfiguring the finance industry as a template for the reengineering of other industries.
- In July 2019, [Carnegie Endowment](#) gathered leading experts in government, banking, industry, and technology to develop an international cybersecurity strategy for the financial sector.
- Carnegie is regularly ranked as one of the top think tanks in the world, and its president for the past seven years, William Burns, was appointed Director of the CIA in March 2021.
- Echoing a widespread concern of world leaders, in November 2020, Carnegie and WEF produced an influential report warning that the global financial system is highly vulnerable to cyber attacks.
- The report recommended social media monopolies work with banks to coordinate censorship. It also encouraged cooperation between banks and law enforcement (e.g, Bank of America turned over credit card records of January 6 Capitol protesters to the FBI).
- Crashing the monetary system with a cyber attack is the perfect scenario to put a nail in the coffin on a dying fiat currency system. The replacement is a cashless society based on the China model of a digital social credit system.
- A controlled demolition of the global banking system would need to eliminate black markets, while ensuring central banks and wealthy elites escape blame and punishment for decades of obscene corruption, rampant pillaging, and criminal activity.

ELITE'S NEAR-FUTURE GAME PLAN

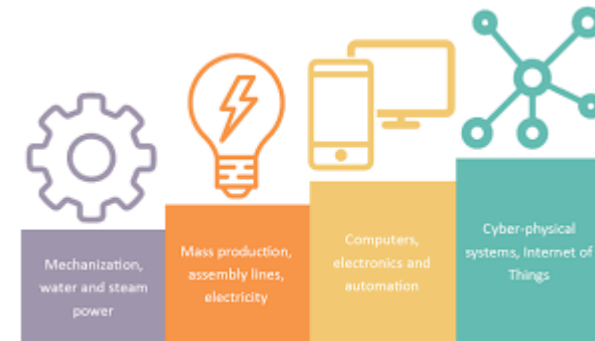

DEPLOY “THE FOURTH INDUSTRIAL REVOLUTION” (4IR)

- The Fourth Industrial Revolution is the merging of our physical, digital, and biological worlds.
- At a whirlwind pace, 4IR is developing unprecedented transformative technologies such as:

Artificial Intelligence
Haptic Robotics
Internet of Things
Genetic Engineering

Quantum Computing
Nanotechnology
5G and 6G Wireless
Augmented and Virtual Reality

- A key component of 4IR is “[SMART Cities](#),” urban environments in which every person, place, and thing connect to the cloud, and their sensory-driven data operates the entire ecosystem.
- For example, [Amazon Sidewalk](#) is a mass wireless sharing network that allows internet use up to a half mile radius for all SMART devices. These sensational new technologies are always rolled out as marvelously convenient and marketed for our safety and well-being.
 - Sidewalk platforms, however, are often hacked, massively invade our privacy, and haunt us with involuntary 24/7 panopticon surveillance.

ELITE'S NEAR-FUTURE GAME PLAN

ENFORCE DIGITAL IDENTITY FOR ALL LIFE ON EARTH

- Digital Identity is the sum total of who you are in cyberspace. You have a “digital twin” that interfaces with the cloud. Your cloud experiences, credentials, and documents as listed below are controlled and monetized by technocrats in service to the 1%.
 - WEB – social media posts, website visits, google searches, gaming
 - LOCATION – maps, geofencing, GPS
 - TRAVEL – tickets, customs, passport, drivers license, self-driving vehicles
 - MEDICAL – hospitals, doctors, medical records, telemedicine, prescriptions
 - WEARABLES – sports, health, time management, communication
 - FINANCIAL – ATM, credit and debit cards, eCommerce, banking, brokerage, cryptocurrency
 - GOVERNMENT – taxes, medicare, unemployment, disability, voting, military service
 - LEGAL – contracts, deeds, leases, employment, insurance, birth certificate
- 4IR technocrats seek to centralize all of the above—and more—in a “blockchain” which is an encrypted, permanent, public, transparent ledger system. It’s essentially a database on steroids in the cloud targeting human behavior, health, and labor. The Great Reset requires a universal digital identity and social credit system.
- Everyone and everything is biologically recorded and tracked, if not chipped, as we are being coerced to cede bodily sovereignty 24/7 to bio-sensors. As digital neo-serfs, our independent actions can be turned on and off at the whim of AI decision makers. The control matrix intends to have full spectrum dominance over all life on earth.

ELITE'S NEAR-FUTURE GAME PLAN

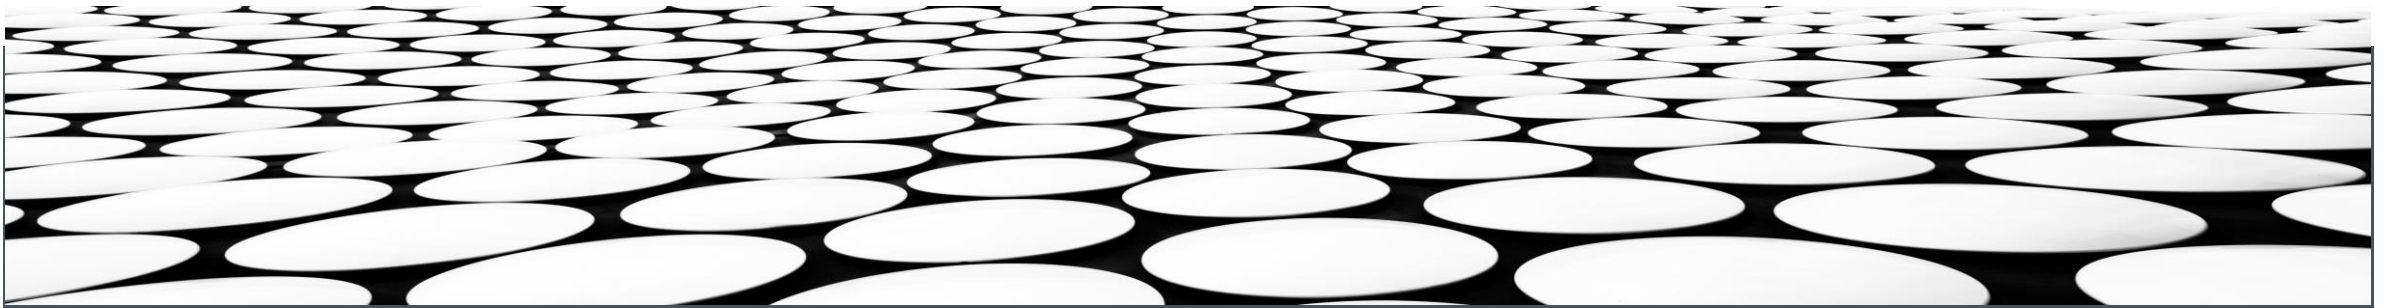

THE SPATIAL WEB

- A perilous juggernaut marketed as the Great Reset is blindsiding humanity. Censorship and propaganda aside, large swaths of society seem unable to recognize a dystopia in the making.
- Native American scholar [Stephen Newcomb](#) describes indigenous peoples genocided by conquistadors, in part because they could not conceive of a race laden with guns, god, germs, and rapacious ambitions. Similarly, people today — assaulted by unfathomable concepts and gobsmacked by a high-tech, settler colonial, financier class — are unable to understand the urgency of the life-or-death stakes we face.
- The new conceptual landscape includes such arcane terms as:

Social impact investing	Pay for Success	Transhumanism
Human capital bond markets	Interoperability	Hypothieation
Stakeholder capitalism	Cyborg Avatars	Synthetic biology
Fourth-generation warfare	Internet of Bodies	Gamification
- The cryptic platforms of the Great Reset require learning a new vocabulary to navigate the New World Order. Enter Alison McDowell, a pioneering independent researcher whose blog, [Wrench in the Gears](#), offers a tutorial for this new lingua franca and its digital ecosystems.
- When learning a foreign language, experts advise deep immersion. Deep immersion in McDowell's work is recommended to optimally understand this complex terrain.

STRATEGIES FOR HUMANITY

SHIFT THE VIBRATION

SPREAD AWARENESS

- The first, most important step is to create awareness. You can't accomplish anything if you are not aware because all action is preceded by thought.
- This is a spiritual war against humanity. As they seek to change us in a negative direction, people of conscience are committed to positive change. Our species is in a great transformational moment with unprecedented opportunities. Each of us has reincarnated on this planet at this time for a reason.
- 2020 witnessed rare cosmic transitions in which Jupiter (bounty and optimism) and Pluto (death and rebirth) augured an extremely propitious time for humanity to begin seizing the opportunity to make profound shifts in consciousness personally and collectively.

SHIFT THE VIBRATION

ENERGIZE THE 100TH MONKEY

- We may not have the numbers, but for those of us who are strong and know the truth, we're worth like 60,000 of their walking braindead.
- According to positivity scientists, all it takes is a mere 5%-10% for a critical mass change to kick in across the zeitgeist. This is known as the [100th Monkey](#) phenomena.
- There's 8 billion of us and only about 5,000 of them. If we collectively refuse to consent and comply with their wish list, there is nothing they can really do to carry out their goals.
- The energy is still very volatile and can go either way. Whatever direction society takes will have tremendous influence over the next 10 years.
- We just need to get more people educated and aware. One by authentic one, we can shift the energy.

SHIFT THE VIBRATION

TAKE ACTION – OUTSMART ‘EM

Preempt Their Strategies

- Klaus Schwab and Bill Gates assert that Covid issues will be supplanted by climate issues. Since we now know Covid science is dicey and serves as the pretext for reshaping the global socio-political economy, we must broadly encourage the public to challenge motives and science of yet another super-duper propaganda campaign again fueled by fear.

Exploit their weaknesses

- The theme of the 2021 annual World Economic Forum was “Rebuild Trust.” Loss of trust in governments, corporations, media, and science plummeted due to Covid discombobulations arising from, for example:
 - Discredited scientific narratives like the Wuhan bat theory
 - Sharp escalation of Soviet-style censorship.
 - Brutal, bewildering policies that ravaged nations, communities, and households
- Investigative journalist [Whitney Webb](#) urges us to exploit that “trust us” weakness. We can do this by using the Wuhan transgression, for example, to advance the position that inquiry and debate must replace unproductive accusations of conspiracy theory.

SHIFT THE VIBRATION

TAKE ACTION – GET SCRAPPY!

The elite are actually quite vulnerable. They know we outnumber them, and so they must keep us in fear and ignorance. We must encourage each other to find our inner warrior and keep the 1% on the offensive.

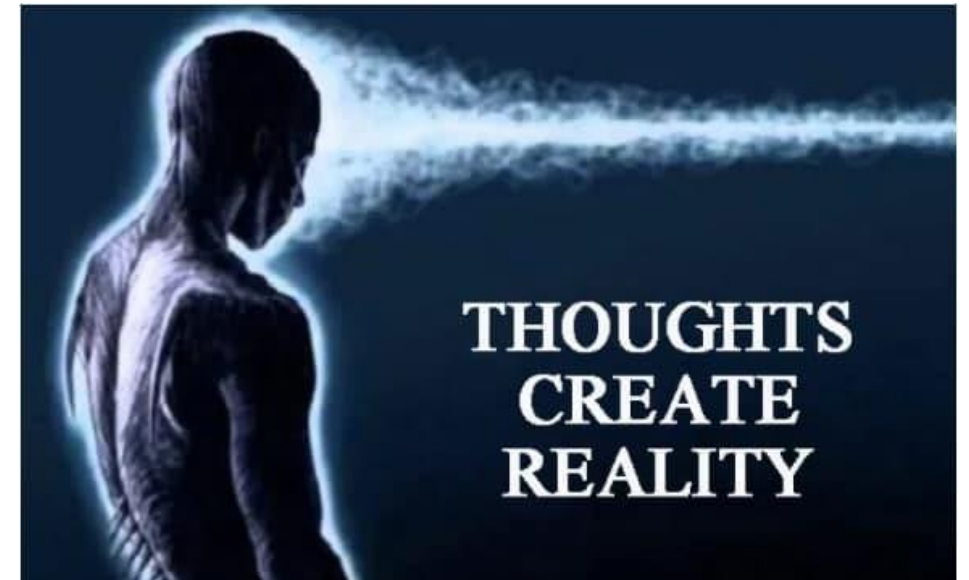

- MARCHES – Now is not the time to sit things out. Now more than ever people need to be in the streets showing them our power in numbers.
 - Following one of the largest mass protests in London, it was reported on May 31, the UK government plans to scrap a domestic vaccine passport.
- LAWSUITS – A flurry of lawsuits and administrative petitions challenge suspect science such as Monsanto GMOs and FDA's wrongful vaccine authorization, as well as draconian policies like shuttering churches and mask mandates.
 - The most explosive case (forthcoming) is German lawyer [Dr. Reiner Fuellmich](#)'s lawsuit against the World Health Organization, among others, for wrongful usage of PCR tests to improperly declare a pandemic. His petition alleges crimes against humanity in violation of the Nuremberg Code.
- CIVIL DISOBEDIENCE – Courageous small businesses refused to lock their doors — a Staten Island bar, a Texas beauty parlor, a New Jersey gym, a Michigan barber, a Toronto BBQ restaurant, and numerous faiths vowed to continue services.
- STREET THEATER – In a performance art piece called [The Kill Shot](#), activists in New York City splayed themselves before the New York Times in an effort to dramatize the inexcusable absence of media coverage of diverse medical opinions.

SHIFT THE VIBRATION

MANIFEST POSITIVE CHANGE

- A priority mission is to integrate left-brain activism (as exemplified by the actions of the previous slide) with right-brain activism expressed below.
- Let's do revocations against the elite's warped vision of the future in which by proclamation we announce, "We do not consent!" Spearheaded by [Alison McDowell, Revocations of Consent](#) to the Fourth Industrial Revolution have been held in front of the troublemakers' places of business, such as the Council on Foreign Relations, the Federal Reserve, Google Cloud Headquarters, Johns Hopkins, and Wharton Business School.
- We need to replace their world vision with a vision we actively plan. Let's define our own reality by manifesting the future. What is your vision? Make your wish list. Wish big!
- All of us have powerful right-brain tools that most of us squander. The elite have purposefully stifled humanity's natural proclivity to tune into our intuitive, psychic abilities where magic happens. We need to find our inner Master Manifestor and proactively create the world we want to live in.
- For simple yet profound guidance, see the [Dandelion Manifesto](#).
